## ANNUAL CUMULATIVE INDEX

Cumulative Subject Index . . . . .	A-3
Cumulative List of Laser Patents . . . . .	A-6
Cumulative Author Index . . . . .	A-7
Cumulative Corporate Author Index . . . . .	A-26

All titles referred to in this annual cumulative index were published in the Journal of Current Laser Abstracts during the period of May 1970 to April 1971. The number following the subject classification index, the author index or the corporate author index is the page number on which the particular abstract will be found.

27 November 1979

The Journal of Current Laser Abstracts is a monthly reference journal dedicated to the comprehensive coverage of the world's open literature on laser theory, design and application. More than one thousand source publications are continually reviewed and include periodicals, conference proceedings, government reports, patents, dissertations, books, etc., in a research and technology range extending from the theory of electromagnetic radiation to such diverse applications of lasers in guidance, holography, display, geodesy, medicine, dentistry, ophthalmology, plus a multitude of other subjects. To make abstracts easier to read and understand, diagrams and configurations are used where practicable to provide pertinent information, replacing lengthy verbal descriptions. Thorough indexing of abstracts by subject headings currently numbering over one hundred topics permits the subscriber to retrieve information in a fraction of the time which would be required by a manual search.

### **SUBSCRIPTION RATES**

Regular rate for one year \$225. University rate for one year \$180. (Limited to universities, colleges, medical schools, hospitals or individuals who are not engaged in industrial or government contract research).
